

LEAD MAGNET

Sample Lead Magnet

A placeholder PDF for testing the Tides of Knowing generator

Sample content only. This short document verifies cover rendering, table of contents generation, article-style sections, worksheet pages, callouts, footer branding, and static CTA text.

Worksheet: Sample Reflection Page

Notes

Sample Introduction

This is sample content only. It exists to test the reusable Tides of Knowing lead magnet PDF generator before a real editorial PDF is prepared.

The generator reads markdown from content-intake/lead-magnets/*/index.md, applies branded print styling, and writes a PDF to public/downloads/.

This is a sample callout. In a real guide, use this space for an important distinction, reminder, or interpretive principle.

What This Sample Tests

- Cover page metadata.
- A generated table of contents.
- Article-style section headings.
- Blockquote callout styling.
- Worksheet page styling.
- Footer branding and page numbers.

Sample Article Section

This section uses ordinary markdown paragraphs. The PDF template should preserve a calm editorial reading experience using the existing Tides of Knowing visual language: cream surface, navy headings, restrained gold rules, and readable body type.

The real lead magnet content can stay focused on the writing. The generator handles document framing, footer branding, section rhythm, and PDF output.

Sample Subsection

Subsections appear in the table of contents beneath their parent sections. They are useful for short teaching points inside a larger guide.

Worksheet: Sample Reflection Page

Use worksheet headings when a lead magnet needs a printable reflection or practice page.

1. What is the question this guide is helping the reader hold?
2. What distinction should the reader remember after closing the PDF?
3. What is the next useful step?

Notes

Leave this section as sample content only. Replace it when preparing a real lead magnet.

CONTINUE WITH TIDES OF KNOWING

Sample CTA only: replace this with the intended next step for a real lead magnet.
